Sowing instructions

Pinto Beans

Indoor sowing: April

Outdoor sowing: half May

Germination: 7-14 days

Germination temp.: 18-22°C

Sowing depth: 3-4 cm

Plant distance: 70 cm

Plant position: sunny

Harvest period: September - October

Sow indoors in April for an early crop. Sow in individual pots 3-4 cm deep and cover the seeds with sowing soil. Keep moist and warm. Transplant them outdoors in May (avoid frosts) to 70 cm apart. Protect the seedlings against snails, slugs and other pests.

Sow outdoors from half May on (avoid frosts) on a sunny, sheltered spot in rich well drained soil. Cover the seeds with some fine sowing soil. Beans hate cold soil. Provide them with support.
