Sowing instructions

Butter Beans

Indoor sowing: from April on

Outdoor sowing: mid may

Germination temp.: 18 - 22°C

Germination: 7 - 14 days

Sowing depth: 3 - 4 cm

Plant position: sunny

Days till harvest: 60 - 90

Sow indoors about 6 weeks before the last frosts (mid-march-april) for an early harvest. Sow in individual pots about 3-4 cm deep and cover the seeds with a thick layer of soil. Keep the temperature as constant as possible about 18 - 22°C.

Sow outdoors on a sunny, sheltered plot with some free draining soil from mid-May, when there's no longer any danger of night frosts. Beans don't tolerate cold soil. Needs support.
